

What is web**POISONCONTROL**?

The **problem**:

6,000 people call U.S. poison centers for poison exposures **daily**.

But **4,000-9,000** more people per day **don't call** for help with a poison exposure.

What's **wrong** with that?

Many people just **guess** whether a possible poisoning is serious. Not getting reliable information from a **poison expert** can result in **consequences** like:

Serious illness

Unnecessary healthcare costs

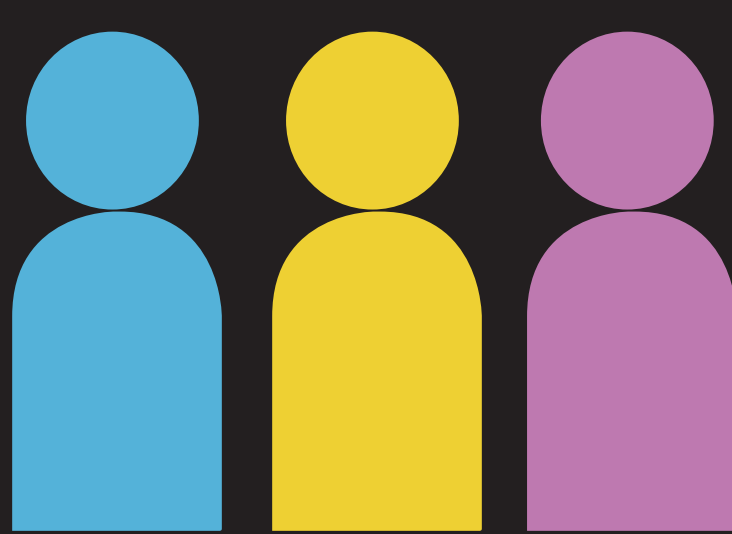

Death

Why aren't they calling?

I **don't like** talking on the phone.

I'm **embarrassed**.

I don't want my **kids to hear** & get scared.

web**POISONCONTROL**[®]

provides **fast, accurate** guidance for poison exposures **online**.
